

Allied Health Practice Visits

45 minute CPD sessions at your practice

Key facts of the Scheme for providers

This session will provide the information you need to understand the role of Allied Health Providers in the Return to Work scheme.

Setting expectations

How to ensure recovery expectations are aligned between patient and therapist?

Screening and outcome measurement tools and resources

This session covers the 'why and how' but most importantly, what to do next following utilisation of these essential tools: Orebro; FAB; Back Tracker; Scans; Activity and Pain.

Health Behaviour Change

- Challenging patients' negative beliefs.
- Changing habits - the Stages of Change Model.
- Discussing factors that make the patient return – 'The Rebounding Patient'.
- Preventing patients at risk of getting stuck.

Working effectively in your team

This session discusses your role in a multidisciplinary team and what you can do to support the treating doctor, other providers and the claims manager.

Functional ability recommendations

This session will discuss how to estimate capacity to assist the treating team in planning return to work.

Effective workplace visits

Why should you schedule a workplace visit?
How to set up and run a workplace visit and what follows it?
