

| Occupation Type | Year of Injury Date | Determination Status | Description | Nature Of Injury Description                                 | Mechanism Of Injury Description                              | Sum of Base Transaction Amount |
|-----------------|---------------------|----------------------|-------------|--|--|--------------------------------|
| Teacher         | FY 2019             | Accepted             |             | Epicontyditis  | Repetitive movement, low muscle loading                      | \$604.66                       |
| Teacher         | FY 2019             | Accepted             |             | Other fractures, not elsewhere classified                    | Falls on the same level                                      | \$15,275.36                    |
| Teacher         | FY 2019             | Rejected             |             | Anxiety/depression combined                                  | Work pressure  | \$4,891.36                     |
| Teacher         | FY 2019             | Accepted             |             | Diseases of the conjunctiva and cornea                       | Hitting stationary objects                                   | \$14,558.98                    |
| Teacher         | FY 2019             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Muscular stress with no objects being handled                | \$0.00                         |
| Teacher         | FY 2019             | Accepted             |             | Contusion, bruising and superficial crushing                 | Falls from a height  | \$1,490.19                     |
| Teacher         | FY 2019             | Accepted             |             | Trauma to joints and ligaments, not elsewhere classified     | Muscular stress with no objects being handled                | \$626.00                       |
| Teacher         | FY 2019             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Muscular stress with no objects being handled                | \$982.50                       |
| Teacher         | FY 2019             | Rejected             |             | Deafness   | Long term exposure to sounds                                 | \$5,068.79                     |
| Teacher         | FY 2019             | Accepted             |             | Contusion, bruising and superficial crushing                 | Falls on the same level                                      | \$79.00                        |
| Teacher         | FY 2019             | Accepted             |             | Unspecified injuries   | Falls on the same level                                      | \$1,090.24                     |
| Teacher         | FY 2019             | Accepted             |             | Bursitis   | Muscular stress while lifting, carrying, or putting down obj | \$16,783.41                    |
| Teacher         | FY 2019             | Accepted             |             | Trauma to joints and ligaments, not elsewhere classified     | Falls on the same level                                      | \$3,776.62                     |
| Teacher         | FY 2014             | Accepted             |             | Deafness   | Long term exposure to sounds                                 | \$24,653.63                    |
| Teacher         | FY 2019             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Falls from a height  | \$832.80                       |
| Teacher         | FY 2019             | Accepted             |             | Other diseases of the respiratory system, not elsewhere clas | Contact with, or exposure to, biological factors of non-huma | \$53,212.08                    |
| Teacher         | FY 2019             | Accepted             |             | Trauma to muscles  | Trauma to muscles  | \$1,197.70                     |
| Teacher         | FY 2019             | Accepted             |             | Meniscus degenerate/detached/retained/chronic tear           | Muscular stress with no objects being handled                | \$1,285.50                     |
| Teacher         | FY 2019             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Being assaulted by a person or persons                       | \$76,022.87                    |
| Teacher         | FY 2018             | Accepted             |             | Mental diseases unspecified                                  | Work related harassment and/or workplace bullying            | \$40,875.61                    |
| Teacher         | FY 2019             | Rejected             |             | Anxiety/stress disorder                                      | Work pressure  | \$14,222.12                    |
| Teacher         | FY 2019             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Muscular stress with no objects being handled                | \$1,777.40                     |
| Teacher         | FY 2020             | Accepted             |             | Other fractures, not elsewhere classified                    | Being hit by moving objects                                  | \$2,978.74                     |
| Teacher         | FY 2019             | Accepted             |             | Reaction to stressors ? other, multiple or not specified     | Work pressure  | \$42,856.02                    |
| Teacher         | FY 2020             | Accepted             |             | Deafness   | Long term exposure to sounds                                 | \$20,593.88                    |
| Teacher         | FY 2020             | Accepted             |             | Trauma to joints and ligaments, unspecified                  | Falls on the same level                                      | \$1,362.99                     |
| Teacher         | FY 2020             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Falls on the same level                                      | \$3,206.45                     |
| Teacher         | FY 2019             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Falls from a height  | \$780.90                       |
| Teacher         | FY 2020             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Unspecified mechanisms of incident                           | \$2,021.66                     |
| Teacher         | FY 2019             | Accepted             |             | Anxiety/depression combined                                  | Work related harassment and/or workplace bullying            | \$79,265.81                    |
| Teacher         | FY 2020             | Accepted             |             | Contusion, bruising and superficial crushing                 | Being hit by moving objects                                  | \$0.00                         |
| Teacher         | FY 2020             | Accepted             |             | Other fractures, not elsewhere classified                    | Falls on the same level                                      | \$44,640.99                    |
| Teacher         | FY 2020             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Being hit by moving objects                                  | \$915.10                       |
| Teacher         | FY 2019             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Muscular stress with no objects being handled                | \$205.10                       |
| Teacher         | FY 2019             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Muscular stress while handling objects other than lifting, c | \$289.50                       |
| Teacher         | FY 2020             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Muscular stress with no objects being handled                | \$827.63                       |
| Teacher         | FY 2019             | Accepted             |             | Trauma to muscles and tendons, not elsewhere classified      | Muscular stress while lifting, carrying, or putting down obj | \$13,688.28                    |
| Teacher         | FY 2020             | Accepted             |             | Trauma to joints and ligaments, not elsewhere classified     | Falls on the same level                                      | \$29,535.98                    |
| Teacher         | FY 2020             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Hitting stationary objects                                   | \$152.10                       |
| Teacher         | FY 2020             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Repetitive movement, low muscle loading                      | \$9,495.53                     |
| Teacher         | FY 2020             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Muscular stress while lifting, carrying, or putting down obj | \$590.00                       |
| Teacher         | FY 2020             | Accepted             |             | Trauma to joints and ligaments, not elsewhere classified     | Falls on the same level                                      | \$2,362.70                     |
| Teacher         | FY 2020             | Accepted             |             | Anxiety/depression combined                                  | Work pressure  | \$11,522.17                    |
| Teacher         | FY 2020             | Accepted             |             | Trauma to muscles  | Muscular stress while handling objects other than lifting, c | \$986.50                       |
| Teacher         | FY 2020             | Accepted             |             | Hot bum  | Contact with hot objects                                     | \$229.00                       |
| Teacher         | FY 2020             | Accepted             |             | Back pain, lumbago, and sciatica                             | Stepping, kneeling or sitting on objects                     | \$4,834.69                     |
| Teacher         | FY 2019             | Rejected             |             | Viral diseases, not classified elsewhere                     | Work pressure  | \$240.92                       |
| Teacher         | FY 2020             | Accepted             |             | Other fractures, not elsewhere classified                    | Being hit by falling objects                                 | \$13,133.93                    |
| Teacher         | FY 2020             | Accepted             |             | Tendinitis   | Being assaulted by a person or persons                       | \$16,714.01                    |
| Teacher         | FY 2020             | Accepted             |             | Soft tissue diseases due to non-traumatic causes with insulf | Falls from a height  | \$1,110.09                     |
| Teacher         | FY 2020             | Accepted             |             | Trauma to joints and ligaments, unspecified                  | Falls on the same level                                      | \$9,911.27                     |
| Teacher         | FY 2020             | Accepted             |             | Trauma to joints and ligaments, unspecified                  | Falls on the same level                                      | \$2,350.77                     |
| Teacher         | FY 2020             | Accepted             |             | Other fractures, not elsewhere classified                    | Being hit by an animal                                       | \$0.00                         |
| Teacher         | FY 2020             | Accepted             |             | Soft tissue injuries due to trauma or unknown mechanisms wit | Hitting stationary objects                                   | \$1,434.60                     |
| Teacher         | FY 2020             | Accepted             |             | Trauma to joints and ligaments, unspecified                  | Falls on the same level                                      | \$1,413.60                     |
| Teacher         | FY 2020             | Accepted             |             | Trauma to muscles and tendons, unspecified                   | Stepping, kneeling or sitting on objects                     | \$640.50                       |
| Teacher         | FY 2020             | Accepted             |             | Laceration or open wound not involving traumatic amputation  | Hitting stationary objects                                   | \$1,359.50                     |
| Teacher         | FY 2020             | Accepted             |             | Contusion, bruising and superficial crushing                 | Being hit by moving objects                                  | \$397.10                       |
